Technology

*i>clicker2* training

Dustin Jensen
Technology Specialist

Monday, August 13
12–1 p.m.
Room 50 Milton Hall
Lunch provided

Please join us for lunch and learn how to use the new *i>clicker2* system in your class. We will provide step-by-step training to get you started using *i>clicker2* for the fall semester.

During the session, you will learn:
- How to operate the new hardware and easy to use software
- *i>clicker2* additional entry types like: True/False, Yes/No, text entry, fill in the blank, numeric entry, ranking, short answer of up to 15 characters, and multiple correct responses
- How to export your roster file from Canvas and upload grades into Canvas
- How to assign points to clicker questions
- Pedagogical uses, peer instruction, and best practices

*i>clicker2* can significantly change the way you and your students interact by enabling you to assess your students’ knowledge, keep their attention, provide immediate feedback, and encourage all students to participate. We will provide a detailed demonstration to help you better understand how *i>clicker* enhances the teaching and learning environment.

Dustin Jensen resides in Colorado Springs, CO, and provides *i>clicker* training and support for instructors.

Registration is required at teaching.nmsu.edu. If you have problems registering online, call 646–2204 for help.
