Class Observations

Do you want to earn higher student evaluations in your classroom or online course?

Now you can!

Instructors who don’t give midterm evals earn end-of-term ratings at the 50th percentile. In contrast, instructors who give midterm evals earn end-of-term ratings in the 58th percentile. Best of all, instructors who give midterm evals and discuss them with a consultant earn end-of-term evals in the 74th percentile.

Tara Gray, Jean Conway, and Sharon Lalla, Teaching Academy; Michaela Burkardt, Physics; and David E. Smith, Chemistry, are available to visit your classroom or online course, review your syllabus, give mid-term evaluations to your students and consult with you afterwards. All consultations are confidential and provide formative feedback only. This means that these consultants cannot write letters for the “evidence from other professionals” section of Digital Measures. For that, you must ask any other peer or enroll in Peer Coaching for Classroom or Online Educators in the Spring of 2014.

Enroll online at www.teaching.nmsu.edu by Friday, August 30 to be contacted for a class visitation.
